2.1P: In Person Check-in 1 – Answer Sheet

1. Briefly describe your prior experience with programming.
   I studied C++ and a little bit of Python at highschool.
   Last semester, I got know more about HTML, CSS, PHP.

2. Based on what you have seen so far, what do you think will be most challenging about this unit?

   It is probably the theories. Theory is always challenging, but I believe I can achieve HD score.

3. What can you do to prepare yourself for that challenge (resources you can use, approach to studying etc.)?

   I love asking people on online forum, they are always fast-response and precise. Whenever I have lab time, I would ask my tutor.

4. Is there anything you think the teaching staff should know to best help you this semester?
   If there is anything, I will say.
